

HYDRO

Hydro Aluminium Rolled Products AS (HARP), environmental policy

HARP will demonstrate a strong sense of responsibility for people, and the environment. Our goal is to be the preferred supplier of lacquered, recycled aluminium in Europe, in a market with an increasing environmental consciousness.

We shall strengthen our position, as a green supplier through making presentations about our We shall design our products to have the minimum adverse impact on the working environment and throughout their entire life cycle.

We shall work for an increased re-use or recycling of our products and their packaging.

Production

We shall work systematically to reduce pollution of air, water, soil and for reduction of noise.

We shall minimise waste and ensure safe destruction or disposal of production waste where recycling or re-use is not possible.

Suppliers

We shall make sure that all of our suppliers of goods or services take environmental care in their business activities. All main suppliers of metal and lacquers shall be environmentally certified have an own similar environmental management system.

Research and development

We shall expand our knowledge of processes and products through research and development to ensure that our solutions are appropriate for the environments future.

Attitude towards public concern

We shall demonstrate openness in all environmental questions.

We shall develop and publicise information about all significant environmental aspects of our activities.

Organisation

We shall work actively to increase the organisation's awareness about environmental issues and the significance of our activities for the environment. We shall encourage the individual employee's involvement in environmental work.

Goals

To meet our long-time goals, we will annually set new environmental goals and make action plans for the various sides of our activity and products.
